

GEOGRAPHY

Our Statement of Intent:

Our high-quality, progressive Geography curriculum aims to inspire a curiosity and fascination of the world which is rooted in the local, with eyes to the global. Fieldwork is an essential element of teaching and learning in our school and incorporates the use of Key Geographical Skills.

Our intention is that children know more and remember more about physical and human processes and have secure locational and place knowledge. Children are also expected to interpret and communicate data with confidence.
